OBJECTIVE

Ambitious and self-esteemed engineering fresher who is capable of applying technical skills for the improvement of the company. Looking forward to work in a competitive environment that can boost my overall learning. Currently pursuing my bachelor degree in Computer Engineering with artificial intelligence specialization. Mainly working in the mobile application development domain using flutter framework and looking forward to backend development and building different types of apps.

SKILLS

- Figma
- Flutter
- Dart programming language
- UI/UX design
- Github
- Vs-Code
- Android Studio

EDUCATION

B.Tech in Computer science with AI specialization

Parul University

2020 – present | Vadodara, India

Hsc

Vithal Vidyalaya

2020 | Vadodara, India

Ssc

Dav Model School

2018 | Dhanbad, India

PROJECTS

Collabor8Mesh (ongoing)

Uniting the diverse minds

Currently, I am actively involved in the development of an ongoing project with my teammates - a Student Collaboration Platform, utilizing Flutter. This innovative platform aims to enhance collaboration and communication among students by providing a centralized hub for sharing ideas and collaborating on academic and extracurricular activities. Leveraging my expertise in Flutter, I am designing and implementing a seamless user interface with features such as group creation, file sharing, event scheduling, and real-time discussions. This ongoing Student Collaboration Platform project showcases my commitment to developing practical solutions that empower student collaboration and foster a vibrant learning community.

Prayaas Ngo Portal

As part of my college minor project, I utilized the Flutter framework to develop a NGO portal. This project focused on creating a seamless and visually appealing platform that connects non-governmental organizations (NGOs) with volunteers and donors. Leveraging the versatility of Flutter, I designed user interface, enabling NGOs to showcase their initiatives, events, and impact stories. Additionally, volunteers and donors can easily explore and engage with various NGOs, fostering collaboration for social causes. By harnessing the power of Flutter, this project demonstrates my proficiency in mobile app development and commitment to making a tangible difference in the world of NGOs.
